

## Key Features

Keep track of your charity sales and oversee your stock control. Manage your merchandise stock levels and locations and process sale or return of goods.

- Store all merchandise items with associated cost and retail prices.
- Manage stock levels which automatically reduce when log as sold. Add stock as needed.
- Allocate items to locations with the ability to return items not sold.
- Create catalogues and allocate merchandise items to these.
- Calculate profit margins on each stock item and catalogue. Add costs of postage and packing when required.
- Process sales with the opportunity to use batching facility to log multiple income lines. Income shows on Merchandise item and the contact records.
- Log and view communications associated with the Merchandise item and link to other contact records.
- Link documents, websites to the Merchandise item.
- Standard analysis reports include stock levels, sales and location.
